Tools & DevOps

Git, GitHub, Postman / Thunder Client, npm, Firebase Authentication

Server Side

Node.js, Express.js, RESTful APIs, MongoDB, Mongoose, JWT Authentication, bcrypt, Middleware (CORS, Helmet), Cloudinary, dotenv, Error Handling

Deployment Platforms

Vercel, Render, Netlify, Hostinger (cPanel)

Projects

WearUp – eCommerce Clothing Platform (MERN Stack)

- Developed a MERN stack-based eCommerce application with secure user authentication, product search and filtering, cart management, and order tracking. Integrated Razorpay for secure online payments and built an admin panel to manage products, users, inventory, and order statuses efficiently.

PathFindr – Job Portal Application (MERN Stack)

- Built a MERN stack-based job portal with secure authentication, job search by city and role, and resume upload functionality. Developed an admin panel to manage companies, job postings, and candidate selection or rejection.

Shivalik Jewels – eCommerce Project

- Worked on both frontend and backend of a jewellery eCommerce website. Built responsive UI using React.js and handled backend with Node.js and Express.js. Implemented product listing, cart functionality, and API integration with MongoDB. Also worked on deploying the application on a VPS server and handled basic server setup.

BookSphere – Online Bookstore Platform (MERN Stack)

- Developed a MERN stack-based online bookstore allowing users to access free content without registration and premium content after sign-up. Implemented a contact form to handle user queries and improve overall engagement.
